## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, drawn to a transducer that operates both to convert acoustic vibrations to electrical signals and to convert electrical signals to acoustical vibrations, classified in class 381, subclass 163.
  - II. Claims 6-9, drawn to a microphone circuit having a desired-signal channel and a noise channel and subtracting a signal of the noise channel from the signal of the desired-signal channel to eliminate noise therefrom, classified in class 381, subclass 94.7.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a self-cleaning microphone or two-way transducer. See MPEP § 806.05(d).

3. 37 CFR 1.141(a) requires that two or more independent and distinct inventions may not be claimed in one national application, except that more than one species of an invention, not to exceed a reasonable number, may be specifically claimed in different claims in one national application, provided the application also includes an allowable claim generic to all the claimed species and all the claims to species in excess of one are written in dependent form (§ 1.75) or otherwise include all the limitations of the generic claim. In the present case, there is no claim generic to all the claimed species.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony M. Jacobson whose telephone number is (703) 305-5532. The examiner can normally be reached on Mon. -Fri. 9-5.
